

Healthcare Technology & EMR Small to Medium Practices

Program Highlights

- Consideration of interplay between EMR and the larger Medical Practice ecosystem.
- Technology Delivery to Remote Locations
- Communications with related medical facilities
- State of all technology infrastructure
- Network , local, and remote access solutions
- Data Security issues comprehensively addressed
- Monitoring of the technology environment to discover issues before they become critical

Features & Benefits

- Physicians need a company that can help them identify the correct EMR package. Mericit Systems assists the client in understanding their technology today and the options and ultimate roadmap that make business and economic sense to them for both their short and long term business plans.

Medical Professionals Face Technology Challenges

Mericit is addressing the wide range of technology issues confronting today's healthcare professionals.

Our consultants have many years of experience working in the healthcare and technology environments. Our principals include the former Chief Technology Officer of Columbia University and we play key roles within the Committee on Healthcare and the Committee on Technology for the Commerce and Industry Association for New Jersey.

MERICIT SPECIALIZES IN IT SOLUTIONS FOR THE HEALTHCARE INDUSTRY

Today healthcare practices face a daunting gauntlet of challenges. Servicing patients, maintaining and increasing business revenues and profit, managing client information from inception through the patient lifecycle, and supporting all of these endeavors with technology solutions. We understand and deliver solutions that work well while adhering to regulatory mandates.

"The experts at Mericit Systems crafted a comprehensive technology infrastructure solution to ensure my mission critical systems are online 24x365."

...Jack Atzmon, MD.
